

REBUTTAL ARGUMENT AGAINST MEASURE N

The School Board is treating property owners as an ATM money dispensing machine. This time hitting them with a permanent \$787 new tax with no cap and an unknown built-in increase every year. It is falsely presented as a renewal. Renewal means to continue the same with the same conditions. This is a new permanent tax with unknown built-in increases every year with no cap.

These taxes started in 2011 with Measure A, a \$200 temporary parcel tax for two years to add extra activities like music and sports. They are on top of the \$70 million dollars the District receives from our taxes through the state and federal government. In 2014, 2016 they increased the taxes, they transformed into \$620 plus yearly increases. The "temporary tax" has gone from \$200 now to \$747. Now they are "starting" the new permanent tax at \$787 with no cap, and built-in increases every year forever. A YES vote is a blank check.

They say "until rejected by the voters" meaning forever. The new tax will be squandered amongst the teachers' unions, employees' bloated salaries with no tangible benefits to students. The days of glory of this District are gone. They are more interested in indoctrinating kids with gender-sexual ideology and anti-parent policies than teaching the basics Civics, English Math and Science.

If you rent house/apartment vote against Measure N. Landlords will pass the new tax on to you as higher rent.

VOTE NO ON MEASURE N
